

**We are** a fast-growing, innovative company near Hamburg Airport - founded by two industry experts and well-funded. Our goal is to create the leading digital B2B automotive platform in Europe. To achieve this goal, we rely on a motivated and competent team and the latest technologies and methods.

**We offer** a modern and innovative working environment, great flexibility and a strong focus on common goals and technical responsibility. Sustainable teamwork is important to us. A family- and career-friendly environment, ongoing training and education is part of our philosophy, as well as cool team events. We are looking for you as

### **Data Engineer (m/f/d)**

#### **These are your tasks:**

- In a cloud environment (in AWS and/or Google Cloud), you will use data engineering tools to implement data lakes and data pipelines for the following areas and ensure their operation:
  - Data Ingestion
  - Data Analytics
  - Data Quality
- You automate manual processes and find tools in order to scale the organisation.
- You assess our data quality and connect external data sources.
- You work with your team to provide easy access to complex data structures within the data lake to enable data-driven applications on the web as well as in the data science environment.

#### **Ideally you have:**

- university degree, doctorate and/or several years of experience in one the fields: data engineering, cloud, data science, computer science or similar
- at least 3 years of professional experience
- The ability to keep an overview and focus on customer requirements even in a complex environment
- You are proficient in SQL and a programming language such as R or Python and are familiar with data engineering tools and data lakes in AWS or Google Cloud, e.g. Pandas, Apache Spark, Apache Beam, dbt, greatexpectations
- Experience in interdisciplinary teams and agile development methods.

We look forward to receiving your application with CV and outline of your skills to [jobs@yoma-solutions.de](mailto:jobs@yoma-solutions.de).
