

We are a fast-growing, innovative company near Hamburg Airport - founded by two industry experts and well-funded. Our goal is to create the leading digital B2B automotive platform in Europe. To achieve this goal, we rely on a motivated and competent team and the latest technologies and methods.

We offer a modern and innovative working environment, great flexibility and a strong focus on common goals and technical responsibility. Sustainable teamwork is important to us. A family- and career-friendly environment, ongoing training and education is part of our philosophy, as well as cool team events. We are looking for you as

Lead / Senior Full Stack Developer (m/f/d)

These are your tasks:

- You look for new technical solutions, try them out and build a resilient infrastructure on AWS.
- You enjoy using new technology, failure is not a defeat for you, but an opportunity to discover new ways of solving problems.
- You are responsible for building and automation of new container-based solutions with Docker with approaches such as GitOps, Terraform and other tools in the area of "Infrastructure as Code".
- You design and continuously improve the tool chain for Continuous Integration and Continuous Delivery.

Ideally you have:

- Several years of experience with AWS cloud architectures from IaaS to PaaS to Serverless and container technologies (e.g. Docker and Kubernetes).
- Experience with common CI/CD tools (e.g. Git, GitHub, CircleCI, Jenkins, etc.).
- Experience in one of the following programming languages: Python, Ruby or Go
- Knowledge of infrastructure as code tools (e.g. Terraform or CloudFormation)
- Knowledge in the area of systems monitoring (e.g. with Prometheus, Elastic, Datadog, NewRelic or Splunk)
- You have the right spirit and drive
- A Cloud certified AWS Developer/Architect is desirable (but not mandatory).

We look forward to receiving your application with CV and outline of your skills to jobs@yoma-solutions.de.
